The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence ad	dress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 7 drawn to a composition.

Group II, claim(s) 1-6, drawn to a method of using the invention of Group I where R¹ is a carbocycle.

Group III, claim(s) 1-6, drawn to a method of using the invention of Group I where R¹ is a heterocycle.

Group IV, claim(s) 1-6, drawn to a method of using the invention of Group I where R¹ is a noncyclic.

2. As set forth in Rule 13.1 of the Patent Cooperation Treaty (PCT), "the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept." Moreover, as stated in PCT Rule 13.2, "where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features." Furthermore, Rule 13.2 defines "special technical features" as "those technical features that define a

contribution which each of the claimed inventions, considered as a whole, makes over the prior art."

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group II is a CB2 modulator. The CB2 modulator of claim 4 does not present a contribution over the prior art. As disclosed in *Suto et al* (WO 97/09315)(Page 5), which is included on Applicant's IDS dated July 28, 2006, the special technical feature of instant claim 4 is anticipated. As such, Group II does not share a special technical feature with the instant claims of Group I-IV. Therefore, the claims are not so linked within the meaning of PCT Rule 13.2 so as to form a single inventive concept, and unity between Groups I-IV is broken.

4. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the

requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Election of Species

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

If Group II-IV is elected, the following species elections are required:

- a) CB2 modulator (a compound of formula (I), (II), or (IV)) recited by claim 4;
 - b) Each compound species of formulas (I) (IV) recited by claims 4;
- c) PDE4 inhibitor (cilomilast, AWD-12-281, NCS-613, D-4418, etc) as recited by claim 5;

Application/Control Number: 10/597,527

Art Unit: 4161

d) Each condition to be treated (immune disorder, inflammatory disorder, pain, rheumatoid arthritis, multiple sclerosis, etc) as recited by claim 6.

Page 5

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. Specifically, as to claim 4, Applicant is required to elect a single compound species from the compounds of formula (I), (II), (III), or (IV). Additionally, as to claim 4, if formula (I) is elected. Applicant is required to define each of R¹-R⁷, R^{8a}-R^{8b}, R⁹, m, q, p, Y, X, n and any additional variables as required for a particular species (a species for example is methyl, NOT alkyl). If formula (II) is elected, Applicant is required to define each of R¹-R⁷, R_a-R_b, x, n, A, Y and any additional variables as required for a particular species (a species for example is methyl, NOT alkyl). If formula (III) is elected, Applicant is required to define each of R¹-R⁴, R⁶, R¹⁰, R_a-R_b, m, A, Y and any additional variables as required for a particular species (a species for example is methyl, NOT alkyl). If formula (IV) is elected. Applicant is required to define each of R¹-R⁷, R^{8a}-R^{8b}, R⁹-R¹⁰, m, q, p, x and any additional variables as required for a particular species (a species for example is methyl, NOT alkyl). As to claim 5, Applicant is required to elect a single PDE4 inhibitor from the PDE4 inhibitors recited by claim 5. As to claims 6, Applicant is required to elect a single condition or disease to be treated or improved by the compound as recited by claim 6. Upon Applicant's election of species, the result must provide a single chemical species and a single condition or disease to be treated or improved. The reply must also identify the claims readable on the elected species,

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

- 6. The claims are deemed to correspond to the species listed above in the following manner: all claims are generic.
- 7. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:
- a-b) The CB2 modulator of instant claim 4 formula I is encompassed by *Suto et al* (WO 97/09315)(Page 5) which is included on Applicant's IDS dated July 28, 2006.

 Accordingly the CB2 species of instant claim 4 lack a special technical feature.
- c) The PDE4 inhibitor roflumilast, as recited by instant claim 5, in the treatment of inflammatory disorders is known in the art (*see* Hatzelmann and Schudt. J Pharmacol Exp Ther, 297(1):267-279, 2001; abstract). Accordingly, the PDE4 inhibitors of instant claim 5 lack a special technical feature.
- d) Each disease or condition to be treated or improved has distinct pathologies and thus lack a special technical feature.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Page 7

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CRAIG RICCI whose telephone number is (571)270-5864. The examiner can normally be reached on Monday through Thursday, and every other Friday, 7:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Nolan can be reached on (571) 272-0847. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
